

Scan, copy and share wide format documents right in your office

Contex SD and XD Series wide format scanners deliver clean, sharp image quality for technical documents, sketches and maps, providing an easy and affordable way to save time on in-house scanning.

Available in 24", 36", 44" and MFP models, SD and XD Series scanners make it quick and easy to scan any technical document for printing, sharing, editing and archiving.

In house, in high quality, and in sync with your office

For many companies, wide format documents are a big headache. Sending these documents to a printing shop for scanning takes time and creates bottlenecks—making the cost of the actual scanning only a small portion of the real cost of having work done out of house. On the other hand, wide format scanners can be costly and complicated to use and maintain, scaring businesses away from making the investment.

That's why we created the SD and XD Series of wide format scanners for your office. Easy to use and surprisingly affordable, these high-quality scanners fit perfectly with your office equipment, your workflows and your people – enabling you to save time and money by scanning, copying and sharing large technical documents in-house.

Produce great-looking scans of oversized maps and drawings

SD and XD Series scanners reproduce your valuable documents faithfully—and then some. They boast 1,200 dpi resolution and 16-bit monochrome/48-bit color capture, as

well as patented B/W threshold technology that cleans up backgrounds and makes good documents look even better. And they work hand in hand with our Neximage enhancement software, which ensures better-than-original scans and helps you prepare maps and technical drawing for digital editing.

Protect your originals

To make sure your originals are handled with care, SD and XD Series scanners feature All Wheel Drive and a precision paper-feed tracking system. Aside from protecting your documents, these technologies prevent distortion and accelerate both one-off and batch jobs.

Perfect integration with office equipment

SD and XD Series scanners integrate easily with your office environment. They work with your printers and other equipment, and they're compatible with the de facto industry standard ISIS driver—so that anyone in your office can operate the scanner right from their EDM/ECM application. This helps you streamline your office workflows and eliminates the need for special training in software use.

Easy to set up, use and maintain

For a wide format scanner to be in sync with your office, it has to work for your people too. SD and XD Series scanners come with a time-saving instant-on feature and an intuitive one-touch interface for navigating features, scanning to the network and copying to a printer. Simple, one-click maintenance and calibration keep your scanner tuned and ready, while the modern, lightweight design makes it easy to move the scanner to wherever it's needed.

Boost worker productivity

There's no point in bringing scanning work in house if your in-house scanner gets in the way of worker productivity. That's why the SD and XD Series scanners feature intuitive face-up

scanning, fast scanning of technical documents, quick and easy archiving features, a straightforward document loading and feed adjustment system, and fast USB 2.0 xDTR data transfer. In a word, they work as fast and efficiently as your people do.

Contex quality

Throughout the lifecycle of your SD or XD Series wide format scanner, you'll benefit from tried and tested Contex quality. From long-lasting, cost-saving LED illumination to affordable, easy to service spare parts, your scanner will prove to be an even wiser investment when you look at the ROI it provides over its long service life.

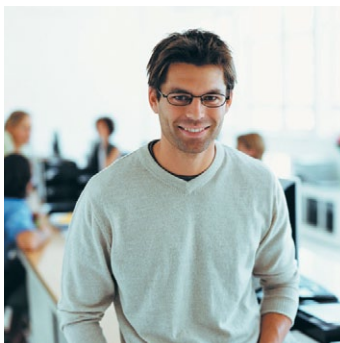

XD2400

SD3600

SD4400

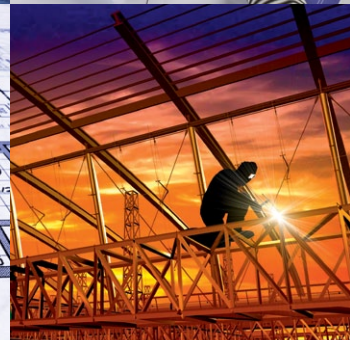

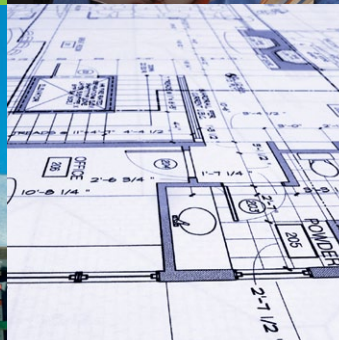

SD Series

Scan, copy and share wide format maps and drawings, with this reliable, easy-to-use office workhorse.

XD Series

Affordable and portable, this lightweight scanner is ideal for projects on the move, while still handling up to D or A1-sized documents.

Devote more time to your projects and customers www.contex.com

About Contex

As the world's largest developer and producer of wide format imaging solutions, Contex leads the market with innovative technology and advanced scan and copy software solutions. Sold worldwide in over 80 countries, Contex solutions are recognized in a wide range of industries for reliability, value, high performance, and superb image quality.

As the global leader, we are always striving to deliver excellent service, superior products and great value to our partners and customers.

Looking Ahead

Contex's research and development work and dedication to our customers have made us a leader in the large format scanning industry, and we will continue to devote ourselves to R&D and market growth in the years to come.

We are confident in our work and our ability to establish strong, enduring relationships with our customers and partners well into the future.

Product range

HDULTRASERIES

– ultimate image quality
Boost productivity and get the ultimate in image quality. Encompassing the latest technologies, the versatile HD Ultra keeps your business running at full capacity.

SDSERIES

– your office workhorse
Scan, copy and share wide-format maps and drawings, with this reliable, easy-to-use office scanner.

XD SERIES

– affordable and portable
A durable, yet lightweight design makes the XD Series ideal for projects on the move, while still handling up to D or A1-sized documents.

MFP SERIES

– turn printers into copiers
Based on our HD Ultra, SD, or XD scanners, these space-saving, plug-and-play solutions come with touch-enabled screen and software for ease of use.

NEXTIMAGE

You can copy, print, email, edit, and scan with Nextimage multi-function wide format software. Just one user-friendly interface, creating the perfect link between your scanner, digital storage, existing software, and printers.

ISIS and TWAIN Drivers

The Contex ISIS driver lets you scan large format documents directly into your electronic document/content management workflow.

TWAIN lets you import images into your other software applications, including Adobe Photoshop, Microsoft Office, Autodesk and EDM solutions.

Industries

We know that requirements vary depending on the types of documents you work with, so we've made sure you can find the right combination of speed, resolution and operational simplicity in our range of solutions, including scan-to-file, scan-to-print and multi-function capabilities. Contex solutions are ideal for processing CAD drawings, plans, blueprints, maps, posters, artwork and many other types of documents.
